# BYOD in Law Firms

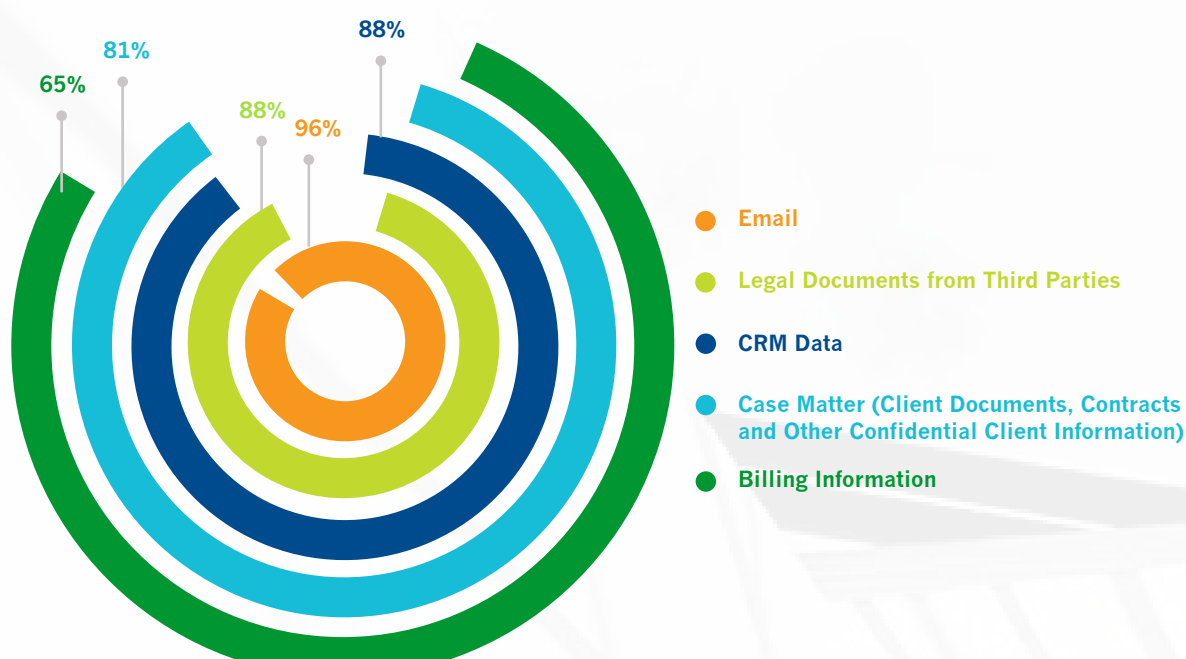

### How many employees in your organisation use their own mobile devices for work?

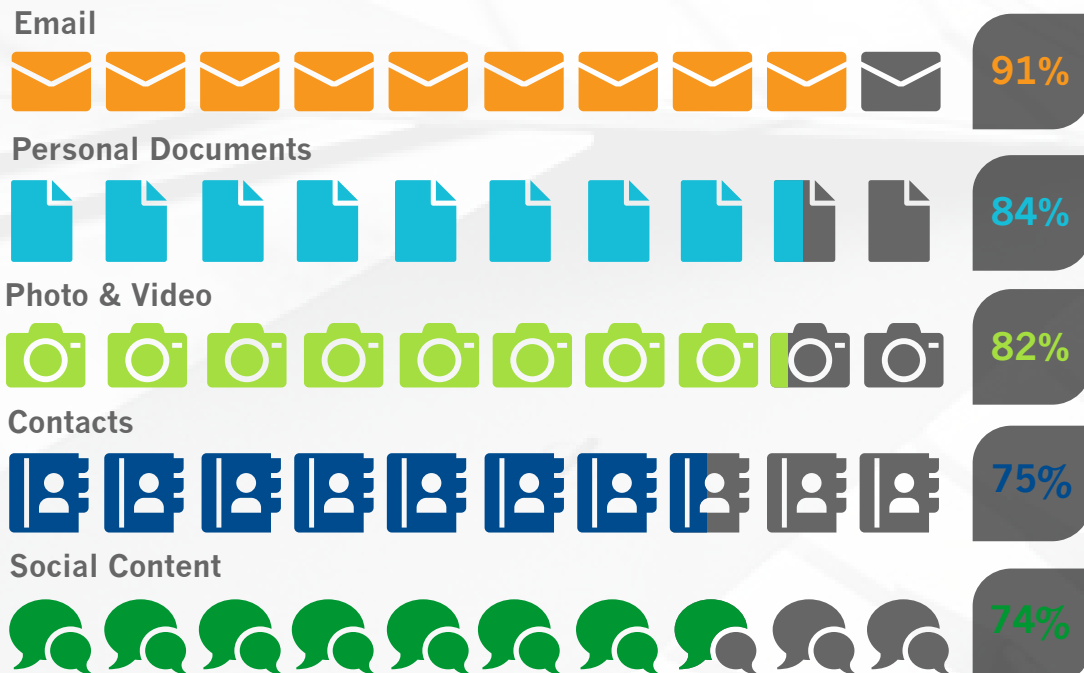

### What are the advantages of BYOD and how important are these?

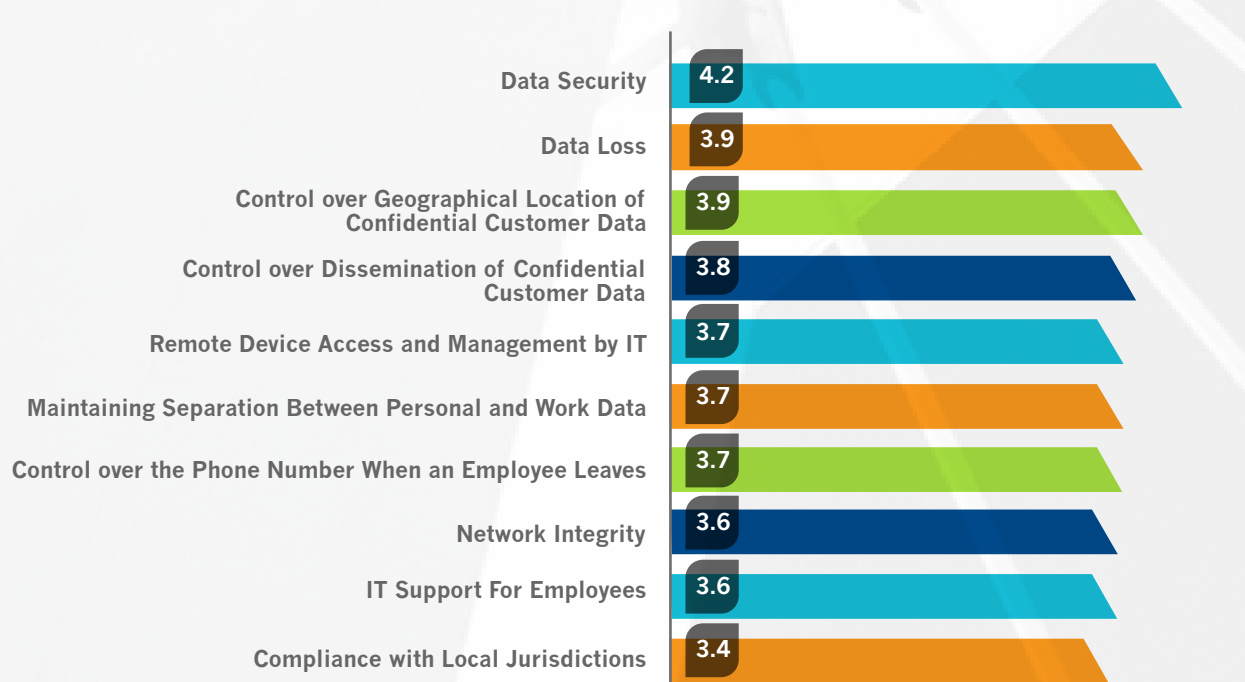

### What types of data and IP owned by the firm are either stored or otherwise available on these devices?

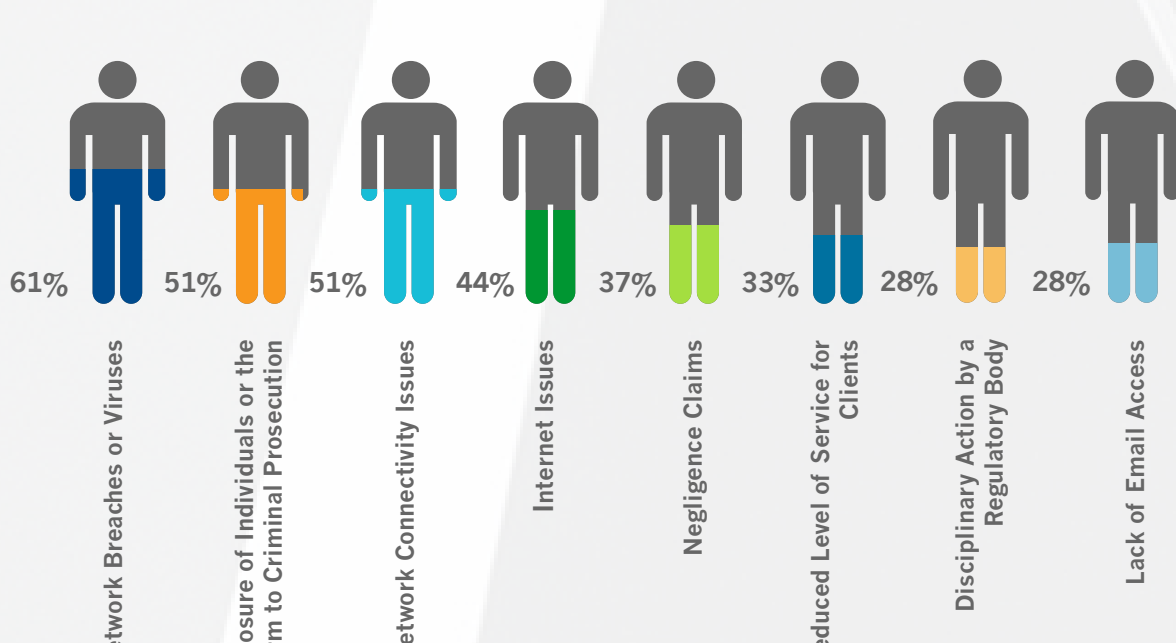

### What types of data and IP owned by the individual may be either stored or otherwise available on these devices?

### What are the disadvantages of BYOD and how challenging are these?

### Which of the following problems have you faced in connection to BYOD?

### Which of the following measures do you currently have in place for managing BYOD? And which of these are you planning to put into place for managing BYOD in the next 12 to 18 months?
