

OPTIMIZING MICROSOFT AZURE INTERCONNECTION FOR GREATER PRODUCTIVITY

Hybrid Multicloud Needs Fast and Secure Private Interconnection

Equinix and Uitas Global provide enterprise solutions for high-performance, scalable and secure Microsoft Azure and hybrid multicloud infrastructures.

Today's enterprise workforce is geographically dispersed and increasingly split across office and home workplaces. This is increasing the demand for direct and secure interconnection at the edge with data, applications, and public and private cloud services to deliver workers the best quality of experience (QoE) possible.

Equinix and Uitas Global Enterprise Hybrid Multicloud services orchestrate, monitor and support interconnection between Microsoft Azure and other cloud service providers (CSP). Uitas Global fully manages Microsoft Azure and other CSPs working together on Platform Equinix® as a seamless, end-to-end, interconnected, hybrid multicloud solution.

Benefits

BENEFITS

Optimize Hybrid Multicloud Connectivity

Equinix and Uitas Global work together to reduce the complexity of hybrid multicloud infrastructures and provide fast and easy access to multiple clouds on a single global interconnection platform.

Unitas Global designs, provisions and manages end-to-end connectivity, delivering a connected cloud fabric across transport-independent infrastructure that includes fiber, Ethernet and IP service options. By leveraging Unitas Global managed services and Equinix interconnection hubs on Platform Equinix, you can integrate users, data, applications and cloud companies using direct, secure and low-latency connectivity.

Reduce hybrid multicloud connectivity costs.

Gain direct on-demand access to cloud ecosystems.

Lower latency between multiple clouds, users, apps, data, etc.

Connect globally with various combinations of cloud services.

Solutions

SOLUTIONS

Take Microsoft Azure ExpressRoute to Greater Productivity

Equinix Fabric™ is an advanced interconnection solution that offers software-defined direct connections to multiple cloud services from a single physical port on Platform Equinix. When combined with Microsoft Azure ExpressRoute, it enables seamless, on-demand and direct access to Microsoft Azure.

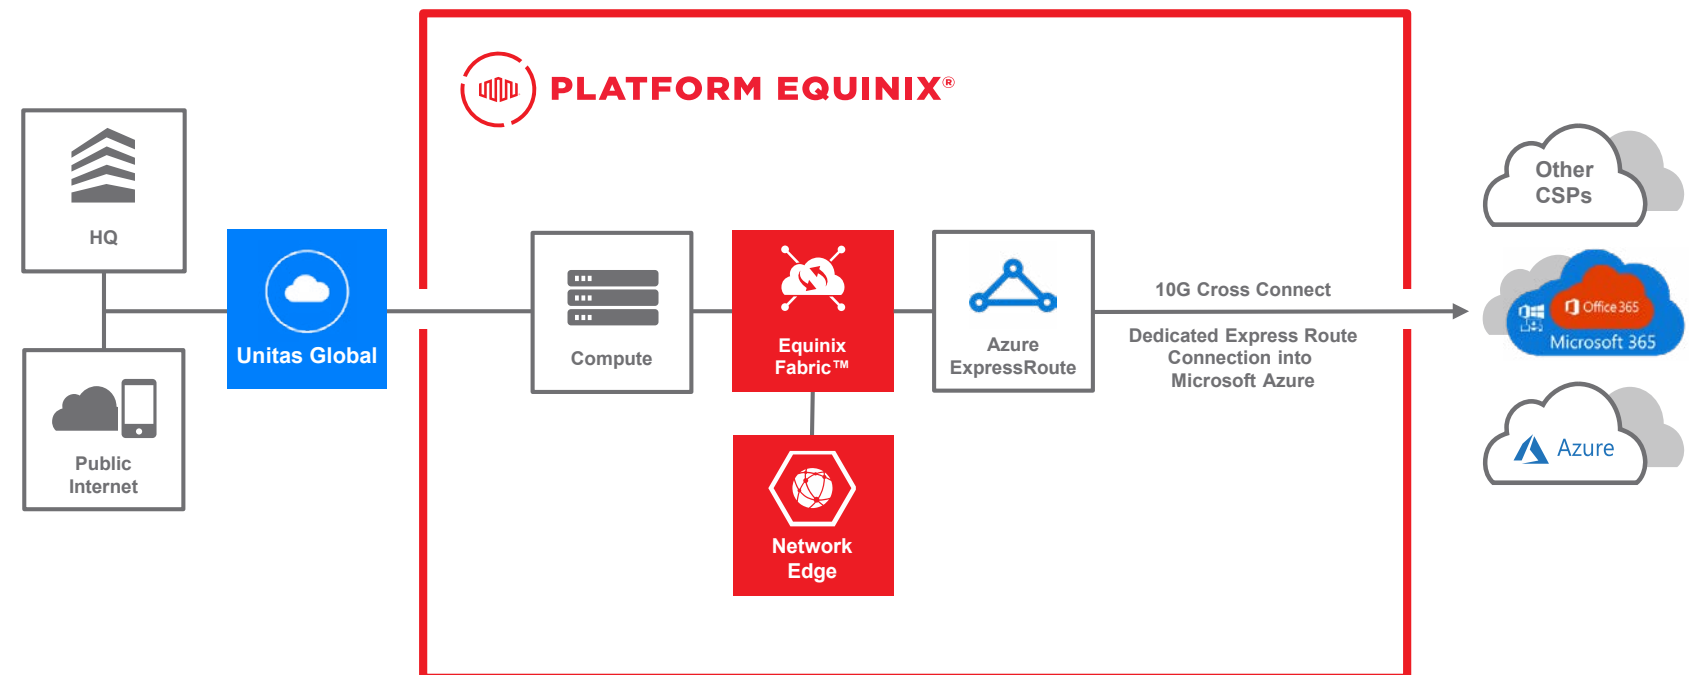

SOLUTIONS

Take Microsoft Azure ExpressRoute to Greater Productivity

Direct and secure interconnection to Microsoft Azure services via Equinix Fabric and Microsoft Azure ExpressRoute enables users to bypass the public internet and access business applications over high-speed (up to 10G), low-latency connections.

Dedicated interconnection to Azure on Platform Equinix can reduce network latency by over 40%. As one of the largest Microsoft Azure ExpressRoute partners, Equinix customers can access Azure and Microsoft 365 applications in more than 26 metros.

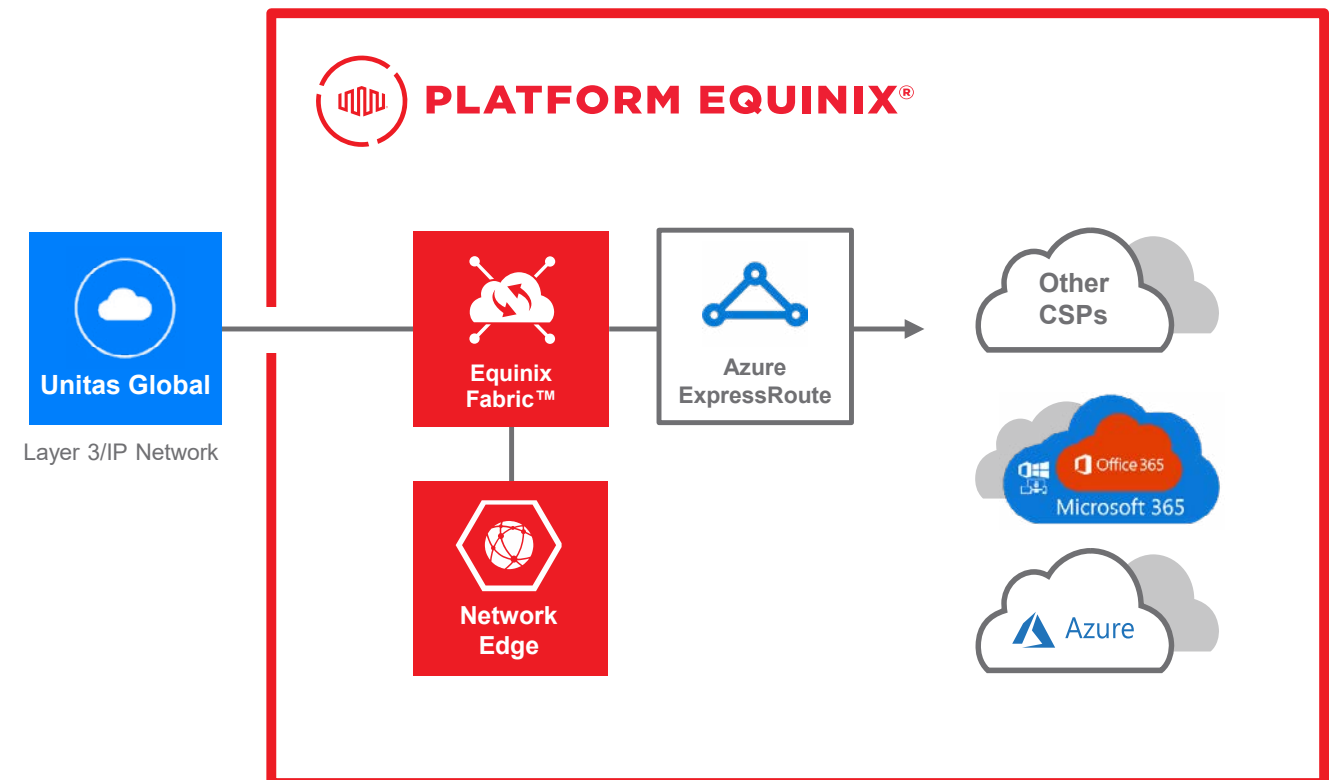

SOLUTIONS

Virtual Interconnection to the Cloud

Network Edge from Equinix enables access to virtual network devices that can interconnect your organization via Equinix Fabric to Microsoft Azure in minutes, without additional networking hardware.

Unitas Global's high-performance layer 3 IP network (AS1828) provides efficient direct connections with other internet, content and Software as a Service (SaaS) providers. This ensures the best and shortest routing possible, enabling internet access to Microsoft Azure and other CSPs.

Additionally, Unitas Atlas™ provides a single pane-of-glass view into your end-to-end hybrid multicloud environment.

Features

FEATURES

Delivering Private Cloud to Public Interconnection at Scale

Simplifying your transition to Microsoft Azure and a hybrid multicloud architecture enables your business to easily integrate and manage its cloud environment across a diverse ecosystem.

Equinix and Uitas Global partner with enterprises to architect the right cloud solution (private or public) to support their business workloads, optimize their environment to manage costs and enhance agility by supporting advanced functions and services.

Enterprise advantages include:

Faster cloud adoption and consumption

Accelerate your company's adoption and implementation of a hybrid multicloud strategy while speeding up your consumption of Microsoft Azure services.

Agile DEVOPS enablement

Leverage automation and repeatability to drive the agile enterprise application development on-premises and in Microsoft Azure.

Application migration best practices

Prioritize your application to Microsoft Azure and other cloud and IT service providers.

Seamless end-to-end management

Gain total visibility of your entire Microsoft Azure and connected hybrid multicloud environment in a single view.

Enhanced Microsoft Azure Interconnection Equals Greater Productivity

About Unitas Global

Unitas Global is the leading provider of managed connected hybrid cloud solutions for global enterprises. Unitas Global provides secure, resilient and dedicated cloud-based IT environments that are easy to consume, fully managed and backed by an end-to-end SLA to deliver cost-efficient performance and innovation. Across an unrivaled, end-to-end software-defined network fabric, Unitas Global connects 24+ million commercial addresses to 4000+ Cloud and SaaS providers across 550+ integrated networks in 84 countries.

About Equinix

Equinix is the world's digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. We enable our customers to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.

More Information
